

Proudly presents

**The 11th Annual
Queensland Transport Infrastructure
Summit**

Planning the Boom State's Sustainable Transport Future

16th-17th September 2008 ~ Brisbane Marriott Hotel

The 11th Annual Queensland Transport Infrastructure Summit will bring together Government, finance, construction and transport leaders to assess the latest infrastructure projects. The summit also provides a fantastic opportunity to discuss important issues such as funding, major projects, skills and regulation with key decision makers in the industry.

With Queensland's growing economy, booming population, rising export volumes and the ongoing climate change debate, the need for relevant and up-to-date information on transport infrastructure development is bigger than ever. **The Honourable John Mickel MP**, Minister for Transport, Trade, Employment and Industrial Relations will deliver a Keynote address outlining the future plans for Queensland's transport infrastructure. We are also pleased to welcome back **Bruce Wilson**, Director-General of Queensland Transport to review lessons learned and discuss the future direction of Queensland's transport infrastructure. You will have the opportunity to hear from CEOs including **Lance Hockridge** of QR, and **Jeff Coleman** of Port of Brisbane Corporation.

Such massive growth in the transport infrastructure industry is causing the climate change debate to become even more heated. The need for planning to reduce emissions is greater than ever in an increasingly environmentally threatened World. Join **Craig Wilson**, Manager, Environmental Sustainability Planning of Asciano, **Rick Morton**, General Manager Planning, Environment and Community of the Port of Brisbane Corporation, **Chris Mangan**, CEO of the Sea Freight Council of Queensland and **Greg Withers**, Executive Director of the Office of Climate Change as they discuss the environmental challenges of transport infrastructure, and how to confront the difficulties associated with a climate challenged World.

On the second day of the event, we are delighted to welcome **International Keynote speaker John Mason**, Head of Enforcement Operations – Congestion Charge, Transport for London, **UK** to deliver an international urban congestion case study.

Day two brings together key players in the public transport industry to discuss the challenges of Queensland's growing urban population, the skills crisis and current developments in road, engineering and PPPs. The list of pre-eminent speakers joining John Mason includes **Peter Moore**, Executive Director of the International Association of Public Transport and **Alan Tesch**, Director-General of the Department of Main Roads Queensland
