ITS—ENHANCING LIVEABLE CITIES AND COMMUNITIES
Environmental Sustainability
Technology, policy and incentives supporting environmentally sustainable operation and choices.

Challenges and Opportunities of Big Open Data
Collection, transmission, and analytics including crowd sourced and V2X data. Privacy and inter-agency issues. Evolution from sparse infrastructure based sensor to ubiquitous vehicle based sensing and real-time predictive traveller information.

Smart Cities and New Urban Mobility
User experience, quality of travel, connectivity and traveller information, future traffic management. Changing models for vehicle use sharing and ownership. Seamless mobility and public transport. Rural areas.

Vehicle and Network Safety
Interventional systems for connected vehicles. Smart, safe infrastructure and support for augmented or automatic vehicles.

Environmental Sustainability
Technology, policy and incentives supporting environmentally sustainable operation and choices.

Cooperative and Automated Vehicles
Increasing augmentation of human driver capabilities. Convergence of sensing, communications and automatic control. Infrastructure requirements for an increasingly automated fleet.

Mobile Applications
Seamless connectivity and convergence of mobile devices and transport platforms. Traveller information, payment, ticketing, crowd sourcing, incentivisation, gamification.

Future Freight
Efficiency of the freight task, automated freight and logistics. Differentiated quality of service and last mile efficiency. Multi modal approaches and interfaces.

Policy, Standards and Harmonization
Supportive technology and regulatory frameworks for accelerated deployment and benefit harvesting.

Multiple demonstrations showcasing and bringing to life advanced ITS technologies
